

Bringing innovation to restore your health

World's first **BIO-CHIP FOR DIAGNOSIS OF
SEXUALLY TRANSMITTED DISEASES**

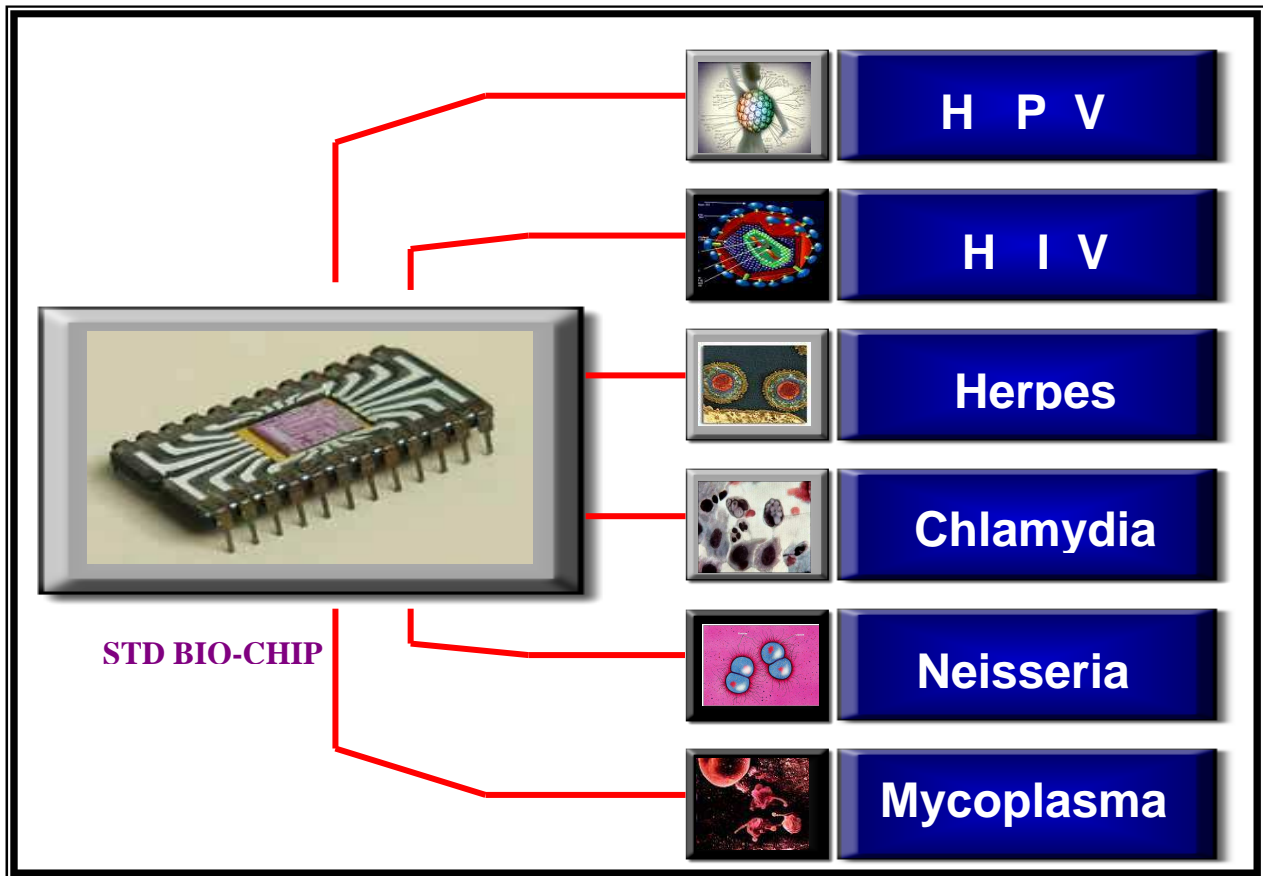

***“That which does not kill us
will only make us stronger”***

**has never been more true than with the
diagnosis of Sexually Transmitted Diseases (STD).
The social stigma attached with STD alone can
cause great emotional stress.**

Our STD Biochip will be designed using pathogen-specific short strands of DNA arranged on a solid substrate that permits diagnostic test for these pathogens to be performed at a real time in order to achieve higher throughput and speed.

Micro array Configuration Panel of STD Bio-Chip

Early diagnosis increases the chances for cure for incurable STDs and reduces the complications caused by all STDs.

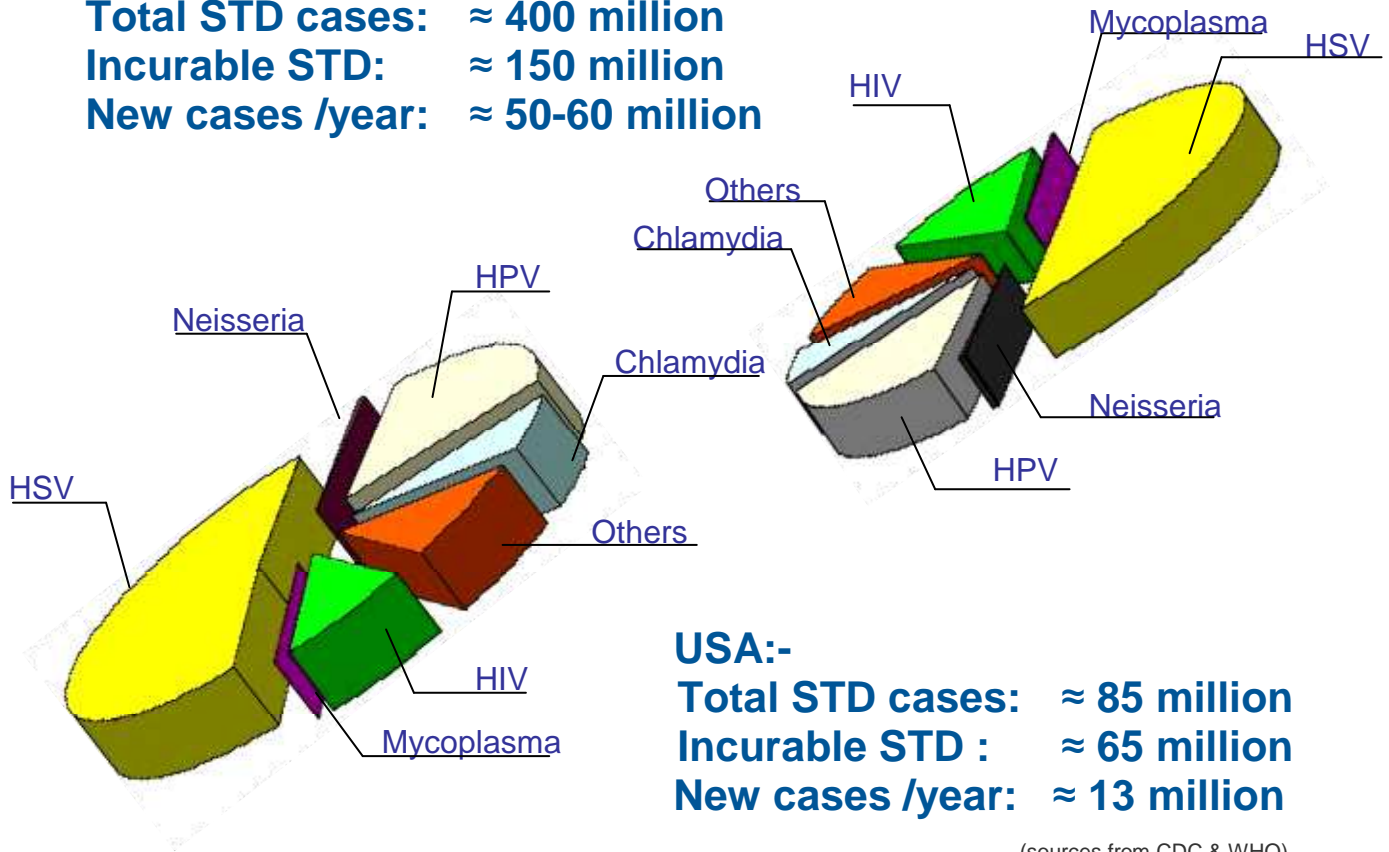

Fact & Figures:-

Worldwide:-

Total STD cases: ≈ 400 million

Incurable STD: ≈ 150 million

New cases /year: ≈ 50-60 million

USA:-

Total STD cases: ≈ 85 million

Incurable STD : ≈ 65 million

New cases /year: ≈ 13 million

(sources from CDC & WHO)

Our STD Biochip meets the today's need of the market like rapid, cost effective, accuracy in the form of personalize palm Top STD Diagnostic system.

"We invite you to participate in this first of its kind Diagnostic solution."

About Globionic:-

Driven by the open mind and curiosity of a newborn, GLOBIONIC® Technologies became India's first Embedded Software Company to create its own Bionic i.e. (Bio-Electronic) research organization. With the power of embedded computing chips, Globionic is ready to answer all your questions- especially the impossible ones.

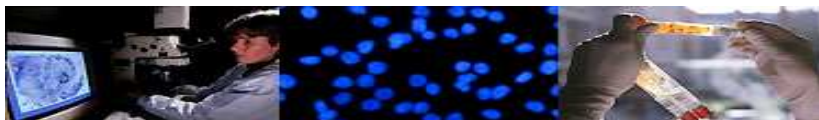

Join our "think & click tank" to discover how your innovations can be seen, heard and felt in a completely new way at Globionic, because the question from now on is:

what would you like to question?

About ACBR:-

Dr. B. R. Ambedkar Center for Biomedical Research (ACBR), in the last ten years, has developed into one of the foremost COE (Centers Of Excellence) at University of Delhi, India. The ACBR provides an enriched environment which fosters applied and innovative research in the area of biomedical sciences.
